Project to Encourage Student Research

Connected with Industry

I. Purpose

To encourage projects that meet the needs of industries, students' research topics in special project research courses for graduating students can be integrated with the needs of industry or areas of expertise of companies. Through industry-university exchanges, professional knowledge can be provided to industries that are in the process of change and upgrading to achieve the goal of the industrialization of knowledge. In addition, academic research results can be applied to patents as to establish specific intellectual property value. In the future, the research results can be transferred to industry in the form of technical rights or technical guidance; and applied in industrial development to solve the problems of enterprises to concretely demonstrate the knowledge value and innovation achievements of the university.
